The dividend payout and composition of currency-hedged share classes are as follows:

The hedging strategy of the currency-hedged share classes aims at mitigating the risk of currency fluctuation against the base currency of the respective funds. Due to execution of the hedging strategy and its technical impact, the composition of dividends (as between net distributable income and capital) may vary from that of the base currency share classes. Investors in the currency-hedged share classes may refer to the NAV and dividend composition of the base currency share classes of the respective funds for a representative illustration of the performance of their investment.

Sources: Allianz Global Investors/IDS GmbH.

** Allianz Global Investors and Voya Investment Management entered into a long-term strategic partnership on 25 July 2022, upon which the investment team transferred to Voya Investment Management. This did not materially change the composition of the team, the investment philosophy nor the investment process. Management Company: Allianz Global Investors Asia Pacific Limited. Delegated Manager: Voya Investment Management Co. LLC ("Voya IM").

1) On 30/4/2021, Allianz Selection European Equity Dividend was renamed to Allianz Thematic Income. There was a material change of the Fund's objective and investment strategy and restrictions as part of a re-positioning and modification exercise. The performance prior to 30/4/2021 was achieved under circumstances that no longer apply. Please refer to the offering documents for details.

The dividend records prior to 30/4/2021 were the records of Allianz Selection European Equity Dividend and do not apply to or should not be considered as a reference to Allianz Thematic Income since the reposition of the Fund took place on 30/4/2021.

Warning: Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

* "Capital" includes unrealised capital gain (if any) and may not necessarily be equivalent to the investors' original investments. "Net distributable income" means the net investment income (i.e. dividend income, interest income and coupons from bonds, net of fees and expenses) attributable to the relevant share class and may also include net realised gains (if any) based on unaudited management accounts for the financial year. However, "net distributable income" does not include net unrealised gains. "Net distributable income" that has been accrued as at the end of a financial year and is declared and paid as dividends at the next distribution date immediately after that financial year end could be treated as "net distributable income" in respect of that financial year. However, "net distributable income" which has been accrued as at the end of a financial year but is not declared and paid as dividends at the next distribution date immediately after that financial year end should be included as "capital" for the next financial year.
