Allianz Global Investors Fund –

Projected dividend per share for the second half of the Fund's financial year 2014 / 2015

- Allianz Global Investors Fund ("AGIF") as an umbrella fund under the UCITS regulations has within it different sub-funds investing in fixed income securities, equities, and derivative instruments, each with a different investment objective and/or risk profile.
- All sub-funds ("Sub-Funds") may invest in financial derivative instruments ("FDI"). In the worst case scenario, such investments may result in substantial loss (as much as 100% of the NAV of the relevant Sub-Fund) due to extensive use of derivatives.
- Some Sub-Funds as part of their investments may invest in any one or a combination of the instruments such as fixed income securities, emerging market securities, and/or mortgage-backed securities, asset-backed securities and/or structured products, exposing to various potential risks (including counterparty, liquidity and market risks).
- Some Sub-Funds may invest in single countries or industry sectors which may reduce risk diversification. The investment focus of such Sub-Funds may give rise to increased risk over more diversified Sub-Funds. Some Sub-Funds may also invest in emerging markets, subject to higher liquidity and market risks due to regulatory, political and/or economic environment.
- Some Sub-Funds may invest in convertible bonds, high-yield, non-investment grade investments and unrated securities that may subject to higher risks (include a risk of a call, credit, default, interest rate changes, general market and liquidity risks) and therefore may increase the risk of loss of original investment.
- Some Sub-Funds may invest a significant portion (e.g. more than 10% and up to 35%) of the assets in interest-bearing securities issued or guaranteed by a non-investment grade sovereign issuer (e.g. Philippines) and is subject to higher risks of credit, concentration and default of the sovereign issuer as well as greater volatility and higher risk profile that may result in significant losses to the investors.
- Some Sub-Funds may invest in Chinese Renminbi interest-bearing securities, convertible bonds and certificates in issued outside Mainland China and assets denominated in offshore Chinese Renminbi which may subject to higher risks of liquidity, credit/solvency of its counterparties, tax policies and risk of not having sufficient RMB for currency conversion prior to investment.
- Some Sub-Funds may invest in European countries. The economic and financial difficulties in Europe may get worse and adversely affect the Sub-Funds (such as increased volatility, liquidity and currency risks associated with investments in Europe).
- Investment involves risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Sub-Fund's income and/or capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease of the NAV per share and the capital of the Sub-Fund available for investment in the future and capital growth may be reduced. Dividend payments are applicable for Class AM Dis (Monthly distribution) and for reference only but not guaranteed. Positive distribution yield does not imply positive return. For details, please refer to the Sub-Fund's distribution policy disclosed in the offering documents.
