

- The Fund aims at long-term capital growth by investing in onshore and offshore People's Republic of China ("PRC"), Hong Kong and Macau equity markets, while achieving an outperformance (i.e. achieve a higher Environment, Social and Governance ("ESG") score) of the Fund's weighted average ESG score compared to weighted average ESG score of Fund's benchmark index by the adoption of the ESG Score Strategy. The Fund does not constitute as an ESG fund pursuant to the SFC's circular issued on 29 June 2021.
- The Fund is exposed to significant risks of investment/general market, country and region, emerging market, company-specific, currency (such as exchange controls, in particular RMB), and the adverse impact on RMB share classes due to currency depreciation.
- The Fund may invest in the China A-Shares market directly via the Stock Connect or other foreign access regimes and/or other permitted means and/or indirectly through all eligible instruments and thus is subject to the associated risks (including quota limitation, change in rule and regulations, repatriation of the Fund's monies, trade restrictions, China market volatility and uncertainty, potential clearing and/or settlement difficulties, change in economic, social and political policy in PRC and Mainland China tax risks).
- The Fund is exposed to risks relating to ESG Score Strategy investment (such as foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, selling securities when it might be disadvantageous to do so, and/or reducing risk diversifications compared to broadly based funds) which may result in the Fund being more volatile and have adverse impact on the performance of the Fund and consequently adversely affect an investor's investment in the Fund.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

Allianz

All China Equity

- Capturing attractive opportunities for both onshore and offshore China equities
- A focused portfolio of high conviction stocks that fit the criteria of growth, quality and valuation
- Key investment themes focusing on domestic-driven growth

Market Insights

1. China's evolving economic importance

- China is the world's second largest economy* today and the China A-shares market is the most direct way to access this opportunity.
- Global investors have added significantly to China A-shares exposure since the asset class became more widely accessible. We believe this trend will continue to reflect the size and scale of China's economy and financial markets.

Chart 1 source from Shenzhen Stock Exchange, Shanghai Stock Exchange, Hong Kong Stock Exchange, Bloomberg, Allianz Global Investors, as of 31 December 2023. The total figures are for comparison only, the stocks included may be listed in more than one exchange. Offshore China stocks are defined based on companies with ultimate parent domiciled in China. Suspended stocks, investment funds and unit trusts are excluded. *Gross Domestic Product (GDP) 2021 in US dollar terms. Source: World Development Indicators database, World Bank, 15 January 2023.

Chart 1: China's equity market may provide investors with broad access to significant opportunities

	Shenzhen A-shares	Shanghai A-shares	China stocks listed in HK	US-listed ADRs	Total
Market cap (USD tn)	4.4	6.5	3.0	1.2	15.1
Number of stocks	2,805	2,263	1,447	171	6,686

2. A wide range of investment opportunities

- China's old growth model was based on low-cost exports. This has already started to change. The future growth model will increasingly be focused on areas such as innovation and the development of new technologies.
- We believe this long-term structural change will result in a wide range of new investment opportunities. This includes areas such as semiconductors, software, robotics & automation, electric vehicles and renewable energy which are often better represented in onshore markets.

Chart 2: Sector breakdown of MSCI China All Shares Index by listing location (%)

3. Difficult to time the China equity markets

- Market timing is difficult in the different China equity markets. As illustrated in the chart, the annual performance gap between the best and the worst performing China equity markets can be as high as 83%. The disparity is huge, considering that they share the same macro backdrop.
- Our "All China" approach only seeks to add value through stock selection, rather than market or sector allocation.

Chart 3 source from Thomson Reuters Datastream, Allianz Global Investors, as of 31 December 2023. Index used for calculation: Shanghai SE Composite Index, Shenzhen SE Composite Index, Hang Seng China Enterprises Index, and BNY Mellon China ADR Index. Investment involves risks. Past performance is not indicative of future performance. Individual performance will vary.

Fund Features

1. A comprehensive China equity strategy

- The Fund invests holistically across China equities irrespective of whether they are listed in Shanghai, Shenzhen, Hong Kong, New York and so on.
- It has a similar allocation to MSCI China All Shares Index (close to 50% China A-shares, 50% offshore China), which is a more balanced representation of growth opportunities in China.

2. Investing with conviction

- By applying three key criteria – growth, quality and valuation, the Fund aims to build a high conviction portfolio that may offer exposure to China's long-term economic growth potential across various sectors.
- The investment team places great importance on in-depth due diligence for stock selection by conducting approximately 1,000 company meetings and site visits yearly. The team also leverages on deep local expertise and unique Grassrootsⁱ Research, as well as ESG Research, which provide valuable market insights, in order to make the best investment decisions.

Chart 4: Key stock criteria

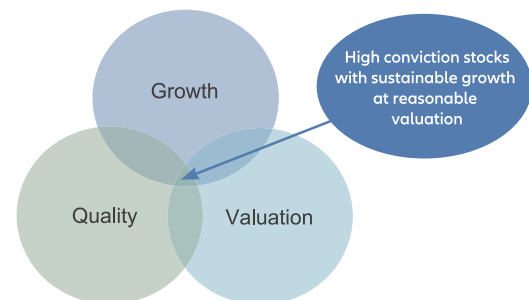

Chart 4 source from Allianz Global Investors.

ⁱ: Grassroots[®] Research is a division of Allianz Global Investors that commissions investigative market research for asset-management professionals. Research data used to generate Grassroots[®] Research reports are received from independent, third-party contractors who supply research that, as far as permissible by laws and regulations, may be paid for by commissions generated by trades executed on behalf of clients.

3. Diverse opportunities in China's growth story

- The Fund provides access to China's long-term growth drivers:

Self-sufficiency – Technology catch up drives import substitution across a broad range of industries – software, semiconductor, artificial intelligence, biotech, food security and energy supply.

Domestic consumption – Long-term economic growth supported by consumption and services sector.

Innovation-enabled upgrade – Adoption of artificial intelligence, big data or digitalization to upgrade profitability and productivity of traditional sectors.

Financial market reform – Ongoing liberalization of China's capital markets and improved market infrastructure to benefit select financial services companies.

Green tech / renewables – China is targeting net zero emissions by 2060. Sustained policy support in areas such as electric vehicles, solar/wind energy, and enabling technology infrastructure.

Chart 5: Areas where we see sustained growth potential

Chart 5 source from Allianz Global Investors, as of 2023. During any given stage of the investment process, the selection criteria may vary from those shown above. The diagrams and statements above reflect the typical investment process applied to this strategy/fund. At any given time, other criteria may affect the investment process.
