

- The Fund aims at long-term capital growth by investing in the China A-Shares markets of the People's Republic of China ("PRC") in accordance with environmental and social characteristics. The Fund aims to achieve an outperformance (i.e. achieve a higher Environment, Social and Governance ("ESG") score) of the Fund's weighted average ESG score compared to weighted average ESG score of Fund's benchmark index by the adoption of the ESG Score Strategy. The Fund does not constitute as an ESG fund pursuant to the SFC's circular issued on 29 June 2021.
- The Fund is exposed to significant risks of investment/general market, country and region, emerging market, company-specific and currency (in particular RMB), and the adverse impact on RMB share class due to currency depreciation.
- The Fund may invest in the China A-Shares market directly via the Stock Connect or other foreign access regimes and/or other permitted means and/or indirectly through all eligible instruments and thus is subject to the associated risks (including quota limitation, change in rule and regulations, repatriation of the Fund's monies, trade restrictions, China market volatility and uncertainty, potential clearing and/or settlement difficulties, change in economic, social and political policy in PRC and Mainland China tax risks).
- The Fund is exposed to risks relating to ESG Score Strategy investment (such as foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, selling securities when it might be disadvantageous to do so, and/or reducing risk diversifications compared to broadly based funds) which may result in the Fund being more volatile and have adverse impact on the performance of the Fund and consequently adversely affect an investor's investment in the Fund.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- Investment involves risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

Allianz

China A-Shares

- Capturing the opportunities of Chinese companies with healthier fundamentals and improving earnings momentum
- A focused portfolio of high conviction stocks that fit the criteria of growth, quality and valuation
- Key investment themes focusing on China domestic-driven growth

Market Insights

1. China's evolving economic importance

- China A-share market has over 5,000 stocks worth more than USD 11 trillion, accounting for ~70% of China equities.
- Global investors have added significantly to China A-shares exposure since the asset class became more widely accessible. We believe this trend will continue to reflect the size and scale of China's economy and financial markets.

Chart 1 source from World Federation of Exchanges (WFE), Hong Kong Stock Exchange, Wind, Allianz Global Investors, as of 31 March 2025. China stocks listed in Hong Kong data as of 28 February 2025. The total figures are for comparison only, the stocks included may be listed in more than one exchange. Offshore China stocks are defined based on companies with ultimate parent domiciled in China. Suspended stocks, investment funds and unit trusts are excluded.

Chart 1: Not investing in China A-shares means missing ~70% of China equities

	Shenzhen A-shares	Shanghai A-shares	China stocks listed in HK	US-listed ADRs	Total
Market cap (USD tn)	4.7	7.2	4.2	1.1	17.2
Number of stocks	2,858	2,282	1,483	381	7,004

2. Low correlations with potential diversification benefits to other asset classes

- The Chinese domestic market exhibits relatively low correlation with other widely held asset classes, because the Chinese domestic market is influenced by unique economic, political, and monetary policy considerations.
- China A-shares are dominated by domestic retail investors, frequently resulting in a different performance outcome compared to other global equity markets.
- China A-shares may add meaningful portfolio diversification, and help investors generate a better overall risk return profile.

Chart 2 source from Bloomberg, Allianz Global Investors, as of 31 March 2025. Correlation data is calculated based on historical return of respective MSCI indices for the past 10 years, using weekly USD return. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Chart 2: Historical correlation between major equity markets

	China A-shares	HK-listed China stocks	APX equities	GEM equities	Japan equities	US equities	European equities	World equities

3. Geopolitical uncertainty has accelerated China innovation

- China's technology capabilities are far more advanced than was previously understood. As China's technological progress becomes increasingly visible, we expect this will lead to a diverse range of investment opportunities.

Chart 3: A diverse range of opportunities

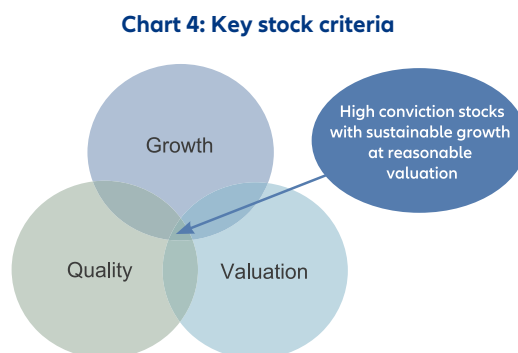

Fund Features

1. All cap approach without market timing

- By applying three key criteria – growth, quality and valuation, the Fund aims to build a focused portfolio of high conviction stocks that offer exposure to China's long-term economic growth potential across various sectors.
- The Fund is primarily invested in pure A-shares, adopting all cap approach without market timing.

Chart 4 source from Allianz Global Investors.

2. Diverse opportunities in China's growth story

- The Fund provides access to China's long-term growth drivers:

Self-sufficiency – Technology catchup drives import substitution across a broad range of industries.

Artificial intelligence – DeepSeek is a likely catalyst for surge in AI applications and expanding ecosystem of technology hardware supports computing power and software.

Manufacturing upgrade – Strategic government policy focuses on enhancing technology-enabled manufacturing base, increasing competitive advantage both in domestic and overseas markets.

Domestic consumption – Increased policy stimulus to offset impact of tariffs. Focus on domestic brands as consumers seek value for money in the challenging macro environment.

Shareholder returns / dividends – Increased focus on corporate governance and improving shareholder returns, with central bank providing credit for share buybacks and dividends.

Chart 5: Areas where we see structural growth potential

Chart 5 source from Allianz Global Investors, as of 2025. During any given stage of the investment process, the selection criteria may vary from those shown above. The diagrams and statements above reflect the typical investment process applied to this strategy/fund. At any given time, other criteria may affect the investment process.

3. Fund performanceⁱ

- As at 31 May 2025, the Fund (Class AT (USD) Accumulation) has achieved a return of 160.65% since inception, outperforming its benchmark by 90.05%. (For full details of fund performance, please refer to the next page.)

i: Allianz Global Investors Fund - Allianz China A-Shares (the "Fund") was launched on 23 October 2019 ("Merger Date") upon the merger of Allianz Global Investors Opportunities - Allianz China A-Shares into the Fund.
