Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice. Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemption. Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance.

Investors should read the offering documents for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited.

Allianz Global Investors Asia Pacific Limited (32/F, Two Pacific Place, 88 Queensway, Admiralty, Hong Kong) is the Hong Kong Representative and is regulated by the Securities and Futures Commission of Hong Kong. (54/F, One Island East 18 Westlands Road, Quarry Bay, Hong Kong).

Manager's Comments

In May, the offshore Renminbi (CNH) appreciated by 0.9% to 7.21 against the USD. This was primarily driven by some relief brought by the US-China 90-day reprieve despite tariff uncertainties remaining elevated, as well as a shift away from US denominated assets into local currencies resulting from the "sell America" narrative. During the same period, the People's Bank of China (PBoC) continued its monetary easing efforts by cutting rates by 10 bps to both its 1-year and 5-year loan prime rate to 3.10% and 3.50% respectively. In addition, the reserve requirement ratio was also reduced by 50 bps to 9.00%. Chinese 10-year government bonds yields rose by 8 basis points to 1.71% by the end of May.

基金經理評論

5月份，離岸人民幣（CNH）兌美元升值0.9%至7.21，其主要原因包括：儘管關稅不確定性仍然較高，但中美兩國暫緩執行關稅90天，有助舒緩市場憂慮；以及「沽出美國」的趨勢導致美國計價資產轉換為本地貨幣。同一時期，中國人民銀行繼續推行寬鬆貨幣政策，1年期及5年期貸款市場報價利率分別下調10點子至3.10%及3.50%。此外，存款準備金率亦下調50點子至9.00%。截至5月底，中國10年期政府債券收益率上升8個點子至1.71%。
