

Allianz Global Opportunistic Bond

PRODUCT KEY FACTS

March 2026

- ***This statement provides you with key information about Allianz Global Opportunistic Bond (the “Sub-Fund”).***
- ***This statement is a part of the offering document.***
- ***You should not invest in this product based on this statement alone.***

Quick facts

Management Company:	Allianz Global Investors GmbH Investment management performed by Management Company (Allianz Global Investors GmbH, Germany (Headquarter)) and the entity listed in the “Investment Managers” section below
Investment Managers:	Allianz Global Investors Asia Pacific Limited, based in Hong Kong (internal delegation) Allianz Global Investors UK Limited, based in United Kingdom (internal delegation)
Depositary:	State Street Bank International GmbH, Luxembourg Branch
Dealing Frequency:	Daily; each day banks and exchanges are open in Hong Kong, Luxembourg, the United Kingdom and the United States
Base Currency:	USD
Dividend Policy:	<p>Distribution Shares (Class A) – will be distributed annually on 15 December (subject to the Company’s discretion)</p> <p>Distribution Shares (Class AM/AMg/AMi/AMgi/AMf) – will be distributed on 15th of every month (subject to the Company’s discretion)</p> <p>Accumulation Shares (Class AT) – all income are reinvested</p> <p>Dividend payments may, at the sole discretion of the Company, be made out of the Sub-Fund’s income and/or capital (Class A/AM/AMg/ AMi/AMgi/AMf). The Company may at its sole discretion also pay distribution out of gross income while charging/paying all or part of the Sub-Fund’s fees and expenses to/out of the capital of the Sub-Fund, resulting in an increase in distributable income for the payment of dividends by the Sub-Fund and therefore, the Sub-Fund may effectively pay dividend out of capital (Class AMg/AMgi). Distributions out of capital or effectively out of capital may result in an immediate decrease of the net asset value (“NAV”) per share of the Sub-Fund. In respect of share classes which adopt the IRD Neutral Policy (Class AMi/AMgi), the distribution amount may not account for the difference in the interest rates between the Sub-Fund’s Base Currency and their respective Reference Currency or Hedging Currency (as the case may be). In respect of Class AMf which pays distribution according to the fixed percentage policy, the distribution amount per share is calculated as follows: fixed distribution percentage ÷ 12 x NAV per share on the last dealing day of the previous month. The fixed distribution percentage is 6% per annum as at the date of this document. Investors should note that fixed distribution percentage is subject to adjustment, and one month prior notice will be provided in case of any change in the fixed distribution percentage. Investors should note that a positive distribution yield does not imply a high or positive return.</p>
Financial year end of the Sub-Fund:	30 September
Minimum Investment:	
Initial	USD 5,000 (or equivalent amount in other available currencies) or EUR 5,000 or HKD 50,000
Subsequent	USD 1,000 (or equivalent amount in other available currencies) or EUR 1,000 or HKD 10,000
Ongoing Charges over a year*	
Class A / AM / AMg / AMi / AMgi / AMf / AT	1.20%

*The ongoing charges figures are calculated based on the costs incurred by the Sub-Fund over a 12-month period divided by the average

net assets over the same period based on the information in the latest audited financial statement for the year ended 30 September 2025. It is provided for each share class available within the Sub-Fund. This figure may vary from year to year. It includes All-in-Fee plus the Luxembourg tax (Taxe d'Abonnement) and excludes transaction cost. Rounding differences may occur.

What is this product?

The Sub-Fund is a sub-fund of Allianz Global Investors Fund (the “**Company**”), which is constituted as an open ended investment company in Luxembourg. It is regulated by Commission de Surveillance du Secteur Financier (“**CSSF**”) in Luxembourg.

Investment Objective

Long-term capital growth and income by investing in global bond markets. As part of the investment process, the Investment Managers apply an opportunistic approach, which provides in particular that a spectrum of macro and credit opportunities are accessed.

Investment Strategy

Sub-Fund assets are primarily invested in global debt securities (eg. corporate bonds and government bonds).

Up to 30% of the Sub-Fund’s assets may be invested in debt securities as described in paragraph 1 above, which, at the time of acquisition, are not investment grade and are rated BB+ or below (by Standard & Poor’s, Fitch or equivalently by other rating agencies) excluding those that are rated CC, C or D (Standard & Poor’s), C, RD or D (Fitch) or Ca or C (Moody’s), or if unrated, as determined by the Investment Managers to be of comparable quality.

Up to 30% of the Sub-Fund’s assets may be invested in emerging markets.

Up to 20% of the Sub-Fund’s assets may be invested in mortgage-backed securities and asset-backed securities.

Up to 20% of Sub-Fund assets may be invested in debt securities in the PRC either directly (via the China Interbank Bond Market (CIBM) initiative or Bond Connect or qualified foreign institutional investor (“**FII**”) program) and/or indirectly through all eligible instruments.

Up to 100% of Sub-Fund assets may be invested in money market instruments and/or held in time deposits and/or (up to 20% of Sub-Fund assets) in deposits at sight and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose and/or any other exceptional circumstances (eg. market crash or major crisis), and if the Investment Managers consider it in the best interest of the Sub-Fund.

Sub-Fund assets may be invested in options and/or future-contracts on global equity indices for both, efficient portfolio management and hedging purposes. Sub-Fund assets must not at any time own a synthetic net long position on any equity indices.

Duration of the assets of the Sub-Fund is between 0 and 9 years.

The Sub-Fund may invest less than 30% of its assets in instruments with loss-absorption features (including contingent convertible bonds, senior non-preferred debt securities, instruments issued under the resolution regime for financial institutions and other capital instruments issued by banks or other financial institutions), of which a maximum of 10% of the Sub-Fund’s assets may be invested in contingent convertible bonds. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger events.

The Sub-Fund is managed in reference to SECURED OVERNIGHT FINANCING RATE (SOFR) (“**Benchmark Index**”) where the Benchmark Index plays a role for measurement and comparison of the Sub-Fund’s performance. However, due to the active management approach adopted by the Investment Managers, the performance of the Sub-Fund and the performance of the Benchmark Index may differ.

Use of derivatives/investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value.

What are the key risks?

Investment involves risks. The Sub-Fund’s investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. Please refer to the Prospectus for details including the risk factors.

1. Investment Risk/General Market Risk

- The Sub-Fund is an investment fund. There is no guarantee of the repayment of principal. The instruments invested by the Sub-Fund may fall in value.
- The Sub-Fund invests in interest-bearing securities, and is exposed to various general trends and tendencies in the economic and political situations as well as securities markets and investment sentiment, which are partially attributable to irrational

factors. Such factors could lead to substantial and longer-lasting drops in prices affecting the entire market. Securities from top-rated issuers are subject to essentially the same general market risk as other securities and assets. All these factors may adversely impact the net asset value of the Sub-Fund.

2. Creditworthiness Risk/Credit Rating Risk

- The creditworthiness (ability to pay) of the issuer of an asset in particular of a security or money-market instrument held by the Sub-Fund may subsequently fall. This usually leads to a decrease in the price of the asset greater than that caused by general market fluctuations. All these factors may adversely impact the net asset value of the Sub-Fund.
- Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- The interest-bearing securities held by the Sub-Fund may be downgraded and may fall in value. This will also lead to a fall in the net asset value of the Sub-Fund. The Sub-Fund may or may not be able to dispose of the debt instruments that are being downgraded.

3. Interest Rate Risk

- To the extent that the Sub-Fund invests in interest-bearing securities (eg. corporate bonds and government bonds) it is exposed to interest rate fluctuations. If market interest rates rise, the value of the interest-bearing assets held by the Sub-Fund may decline substantially. This applies to an even greater degree if this Sub-Fund also holds interest-bearing securities with a longer time to maturity and a lower nominal interest rate. All these factors may adversely impact the net asset value of the Sub-Fund.

4. Default Risk

- The Sub-Fund is exposed to the credit and default risk of issuers of the debt securities that the Sub-Fund may invest in.

5. Valuation Risk

- Valuation of the Sub-Fund assets may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the NAV calculation of the Sub-Fund.

6. Sovereign Debt Risk

- The Sub-Fund's investment in interest-bearing securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Sub-Fund to participate in restructuring such debts. The Sub-Fund may suffer significant losses when there is a default of sovereign debt issuers.

7. Specific Risks of Investing in High-Yield (Non-Investment Grade and Unrated) Investments

- Investing in high-yield (non-investment grade and unrated) investments are normally associated with higher volatility, greater risk of loss of principal and interest, increased creditworthiness and downgrading risk, default risk, interest rate risk, general market risk, and liquidity risk (for example, the asset cannot be sold or can only be sold at a significant discount to the purchase price).

8. Emerging Market Risk

- The Sub-Fund invests in emerging markets which involve increased risks and special considerations not typically associated with investment in more developed economies or markets, such as greater political, tax, legal, economic, foreign exchange/control, liquidity, regulatory risks, settlement risks, custody risk and the likelihood of a high degree of volatility. The accounting, auditing and financial reporting standards may deviate substantially to the Sub-Fund's detriment. All these factors may adversely impact the net asset value of the Sub-Fund.

9. Currency Risk

- The Sub-Fund may hold assets denominated in foreign currencies other than its base currency. The Sub-Fund may also launch a class of shares that may be designated in a foreign currency other than the base currency of the Sub-Fund. Accordingly the Sub-Fund and investors of such class of shares are exposed to a currency risk that if these foreign currency positions have not been hedged or if there is any change in the relevant exchange control regulations, the net asset value of the Sub-Fund may be affected unfavorably. Any devaluation of the foreign currency against the base currency of the Sub-Fund would cause the value of the assets denominated in the foreign currency to fall and adversely impact the investor.

10. Derivatives Risk

- The Sub-Fund may invest in derivatives, which may expose the Sub-Fund to higher leverage, valuation, volatility, counterparty, liquidity, market and over the counter transaction risks, all of which may adversely impact the net asset value of the Sub-Fund. The leverage component of financial derivative instruments ("FDI") can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund.
- The Sub-Fund's use of FDI in efficient portfolio management (including for hedging) may become ineffective and/or cause the Sub-Fund to suffer significant losses.

11. Risk related to Distribution out of Capital and Distribution effectively out of Capital

- The payment of distributions out of capital/distributions effectively out of capital represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. Any distributions involving payment of distributions out of the Sub-Fund's capital/distributions effectively out of the Sub-Fund's capital may result in an immediate decrease in the Net Asset Value per Share and may reduce the capital available for the Sub-Fund for future investment and capital growth.
- The distribution amount and NAV of any hedged share classes of the Sub-Fund may be adversely affected by differences in the interest rates of the reference currency of the hedged share classes and the base currency of the Sub-Fund, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged

share classes, particularly if such hedged share classes are applying the IRD Neutral Policy.

12. Risk related to share class with fixed distribution percentage (applicable to Class AMf)

- Investments in the share classes with fixed distribution percentage are not an alternative to a savings account or fixed interest paying investment. Investors should note that fixed distribution percentage is not guaranteed. The percentage of distributions paid by the share classes with fixed distribution percentage is unrelated to expected or past income or returns of these share classes or the Sub-Fund. The distribution can thus be higher or lower than the income and return that were effectively realised.
- Share classes with fixed distribution percentage will continue to distribute in periods that the Sub-Fund has negative returns or is making losses, which further reduces the Net Asset Value of the relevant share class. Investors may not be able to get back the original investment amount.
- Investors should note that a positive distribution yield does not imply a high or positive return. Also, share classes with fixed distribution percentage do not distribute a fixed amount and the constant percentage of distribution results in higher absolute distributions when the Net Asset Value of the relevant share class is high, and lower absolute distributions when the Net Asset Value of the relevant share class is low.

How has the Sub-Fund performed?

- Share Class*: A-EUR
 - Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
 - The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested.
 - These figures show by how much the share class increased or decreased in percentage during the calendar year being shown.
 - Performance data has been calculated in EUR including on-going charges and excluding subscription fee and redemption fee you might have to pay.
 - Sub-Fund inception date: 2015
 - Share Class inception date: 2015
 - The Benchmark Index was US DOLLAR 3 MONTHS LIBOR (valid until 30 August 2020). From 31 August 2020, The Benchmark Index is SECURED OVERNIGHT FINANCING RATE (SOFR). The Benchmark Index was changed owing to cessation of LIBOR.
- *Representative share class – Retail share class that is authorized and launched in Hong Kong with the longest track record.

Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.

Fee (Class A/AM/AMg/AMi/AMgi/AMf/AT)	What you pay
Subscription Fee	Up to 3% of the NAV
Switching Fee (Conversion Fee)	Up to 3% of the NAV (for switch-in)
Redemption Fee	No Redemption Fee is currently levied

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % p.a. of the NAV)
Management Fee (All-in-Fee) (Class A/AM/AMg/AMi/AMgi/AMf/AT)	Maximum: 1.14%
	Current: 1.14%

Depository Fee
Performance Fee
Administration Fee

The Depository Fee is covered by All-in-Fee
Not Applicable
The Administration Fee is covered by All-in-Fee

Other fees

You may have to pay other fees when dealing in the shares of the Sub-Fund. The Sub-Fund will also bear the costs which are directly attributable to it, please refer to the section headed "FEES AND CHARGES" in the Prospectus for further details.

Additional information

- You generally buy and redeem shares at the Sub-Fund's next-determined net asset value (NAV) after Hong Kong Distributor/Hong Kong Representative receives your request in good order on or before 5:00p.m. (Hong Kong time) on any Valuation Day which is also a Hong Kong Business Day.
- Intermediaries who sell this Sub-Fund may impose different dealing deadlines for receiving instructions for subscriptions, redemptions or conversions. Investors should pay attention to the arrangements of the intermediary concerned.
- The net asset value of this Sub-Fund is calculated and the price of shares published each Valuation Day. They are available online at hk.allianzgi.com.
- The compositions of the distributions (i.e. the relative amounts paid out of (i) net distributable income, and (ii) capital) for the last 12 months or since the launch of the Sub-Fund are available from the Hong Kong Representative on request and also on the website (hk.allianzgi.com).
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors from the Hong Kong Representative on request and also on the website (hk.allianzgi.com).
