

- The Fund aims at income and long-term capital appreciation by investing in global interest bearing securities and global equities with a focus on theme and stock selection.
- The Fund is exposed to significant risks which include investment/general market, thematic concentration, thematic-based investment strategy, asset allocation, emerging market, company-specific, creditworthiness/credit rating/downgrading, interest rate changes, default, volatility and liquidity, valuation, and currency (such as exchange controls, in particular RMB), and the adverse impact on RMB share classes due to currency depreciation..
- The Fund may invest in financial derivative instruments ("FDI") which may expose the Fund to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The use of derivatives may result in losses to the Fund which are greater than the amount originally invested. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's income and/or capital which in the latter case represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per distribution unit and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund, particularly if such HSC are applying the IRD Neutral Policy.

Allianz

Thematic Income

- Invests in 7 core themes for future growth with a diversified portfolio of stocks and credits
- Helps buffer volatility and capture growth opportunities
- Distribution AM/AMg share classes aims to pay monthly dividend (yields are not guaranteed, dividend may be paid out from capital)^{Note}

7 investable themes are influencing our daily life

Over the past decades, the world economy has seen structural transformations sparked by technological innovation, urbanisation, resource scarcity, and changes in the demographic and social landscapes. Identifying these macro-level themes allows investors to capitalise on future trends and capture the best investment opportunities over a long-term horizon.

1. Health Technology

Health Tech, such as wearable biosensing technology and cloud database, will become an increasingly important part of our everyday life and the health care industry.

2. Generation Wellbeing

This theme taps into the potential of a large and increasingly influential generation – Gen Z and the closely related Millennials – to benefit from the structurally changing consumption patterns driven by social and demographic changes.

3. Infrastructure

This theme covers a wide range of raw material manufacturers, construction companies and equipment suppliers.

4. Next Generation Energy

Clean energy, efficient energy storage and sustainable energy consumption patterns will dominate the future energy world.

5. Intelligent Machines

The theme looks at robotics, automation and supporting software.

6. Clean Water and Land

Companies that improve the water supply, water quality or water efficiency, as well as companies engaging in recycling and waste treatment, will be in the spotlight.

7. Digital Life

eCommerce, social media and video-on-demand are becoming more mature, while areas such as digital finance, eSports and remote working offer huge potential.

Why invest in Allianz Thematic Income (“the Fund”)?

1. A diversified portfolio across global equity and credit markets

The Fund is a diversified portfolio of securities across global equity and credit markets that seek potential growth while managing portfolio volatility.

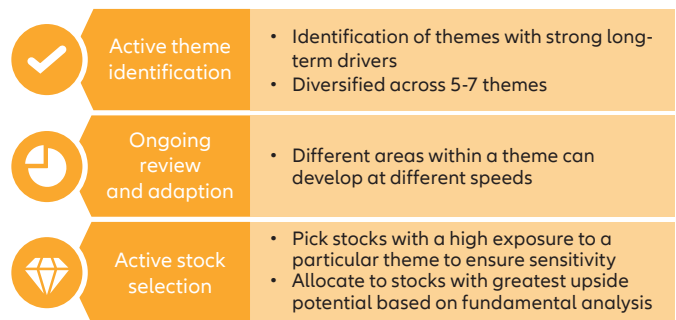

2. Equity Sleeve: Participate in growth areas of the world’s economy

The Fund aims to identify the investment opportunities that arise from structural shifts by investing in the themes best positioned to benefit from these long-term fundamental changes.

The equity sleeve aims to control portfolio volatility through diversification of holdings. The equity sleeve targets to have 150 to 200 holdings which imply the average weighting of each equity holding to be no more than 1.5% of the equity sleeve.

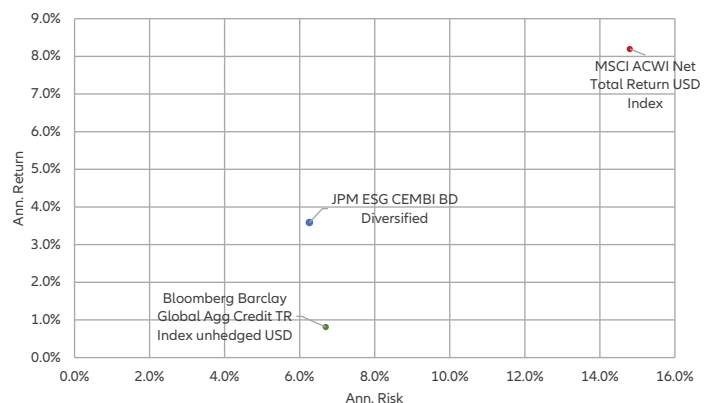

Equity Sleeve: Three Sources of Alpha

3. Lower portfolio volatility with additional sources of income

The Fund invests in global corporate credits and global emerging market corporate bonds, which aims to provide additional sources of income and manages the volatility of the portfolio.

10-year Annualize Risk/ Return (May 2014-Apr 2024)

Morgan ESG Corporate Emerging Markets Bond Index Diversified. Bloomberg Barclay Global Agg Credit TR Index unhedged USD = Bloomberg Barclay Global Aggregate Credit Total Return Index unhedged USD. Past performance is not indicative of future performance.

4. Credit Sleeve : Global corporate credits and emerging markets corporate bonds

The strategic allocation is distributed between 50% Global Corporate Credits SRI and 50% Emerging Markets Corporate Bonds SRI.

Both global corporate credits and global emerging markets corporate bonds sleeves screen companies, via our proprietary Socially Responsible Investment (SRI) process, for controversies which could impact future performance and excludes controversial businesses from its investment universe. This will help to improve portfolio quality and promote sustainability objectives and values.

Credit Sleeve Strategic Allocation

A stream of potential income

The Fund's AM and AMg share classes aim to pay monthly dividend (yields are not guaranteed, dividend may be paid out from capital)^{Note}. It helps investors to capture potential source of income.

* On 30/4/2021, Allianz Selection European Equity Dividend was renamed to Allianz Thematic Income. There was a material change of the Fund's objective and investment strategy and restrictions as part of a re-positioning and modification exercise. The performance prior to 30/4/2021 was achieved under circumstances that no longer apply. Please refer to the offering documents for details.

Fund performance is calculated on NAV to NAV basis in denominated currency of the respective share class with gross dividends re-invested. Benchmark performance is calculated in denominated currency of the respective share class. HKD/USD based investors are exposed to foreign exchange fluctuations.

- 1) Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only. Yields are not guaranteed, dividend may be paid out from capital (Class AM). This may result in an immediate decrease in the NAV per distribution unit and may reduce the capital available for the Fund for future investment and capital growth. Positive distribution yield does not imply positive return.
- 2) Annualised Dividend Yield = $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{12} - 1] \times 100$. The annualised dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Historical dividend yield is not indicative of future dividend payouts.
- 3) The Fund Size quoted includes all share classes of the Fund.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions.

Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance. Investors should read the offering documents for further details, including the risk factors, before investing.
