#### Allianz Global Investors Fund AM

- The Fund is exposed to significant risks of investment/general market, country and region, emerging market, creditworthiness/credit rating/downgrading, interest rate, default, valuation, sovereign debt, RMB and the adverse impact on RMB share classes due to currency depreciation.
- The Fund may invest in high-yield (non-investment grade and unrated) investments which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may increase the risk of loss of original investment.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.
- Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

#### **Investment Objective**

The Fund aims at long-term capital growth and income by investing in high yield rated corporate bonds of US bond markets.
