

- The Fund aims at long-term income and lower volatility by investing in short duration high yield rated corporate bonds of the United States of America ("US") bond markets in accordance with environmental and social characteristics. The Fund aims to achieve the Sustainability KPI with the adoption of the Sustainability Key Performance Indicator Strategy (Absolute) ("KPI Strategy (Absolute)"). The Fund does not constitute as an ESG fund pursuant to the SFC's circular issued on 29 June 2021.
- The Fund is exposed to significant risks of investment/general market, creditworthiness/credit rating/downgrading, default, interest rate, valuation, sovereign debt, country and region, and the adverse impact on RMB share classes due to currency depreciation.
- The Fund is exposed to sustainable investment risks relating to KPI Strategy (Absolute) (such as foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, selling securities when it might be disadvantageous to do so, and/or reducing risk diversifications compared to broadly based funds) which may result in the Fund being more volatile and have adverse impact on the performance of the Fund and consequently adversely affect an investor's investment in the Fund.
- The Fund may invest in high-yield (non-investment grade and unrated) investments and convertible bonds which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may adversely impact the net asset value of the Fund. Convertible may also expose to risks such as prepayment, equity movement and greater volatility than straight bond investments.
- The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- This investment may involve risks that could result in loss of part or entire amount of investors' investment.
- · In making investment decisions, investors should not rely solely on this material.

Note: Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

Allianz US Short Duration High Income Bond

- Potential sustainable income opportunities
- Diversification to overall fixed-income allocation
- Investment capability in managing short duration, high-yielding assets

Market Insights

1. Yield Opportunity amid tighter monetary environment

- Bonds with longer durations tend to be more sensitive to rising interest rates than those with shorter durations. In a tighter monetary environment, US short duration high yield bonds offer a compelling yield opportunity with lower interest-rate sensitivity to enhance diversification and relative performance.
- With the market trading at a discount to face value, high yield bonds offer attractive total return potential and spreads that compensate for risks.

Chart 1 source from ICE Data Services, as at December 2024. High yield performance is measured using ICE BofA US High Yield Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Chart 1: Historical positive returns following a down year

2. Default Rates remain below historical peaks

 Credit fundamentals are healthy, near-term refinancing obligations remain low and management continues to prioritize debt reduction. Default rates are expected to remain well below the historical cycle peak.

Chart 2 source from BofA, JP Morgan, as at December 2024. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Chart 2: Historical defaults rates of high yield bonds

3. Shorter maturity, attractive yields

 Short duration high yield bonds provide a higher yield while offering shorter maturities than their longer-term counterparts.

Chart 3 source from Voya Investment Management, FactSet, ICE Data Services. Data from November 2009 to December 2024. 0-5 Yr US High Yield: ICE BofA 0-5 Year US High Yield Constrained Index; US High Yield: ICE BofA US High Yield Index; US Core Bonds: Bloomberg US Aggregate Bond Index; US Treasury Current 10-Year: ICE BofA US Treasury Current 10 Year Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Fund Features

1. Potential sustainable income opportunities available

- The Fund focuses on long-term income by investing in short duration high yield rated corporate bonds of the US bond markets.
- The Fund's AM share classes aim to pay monthly dividend (dividend yields are not guaranteed, dividend may be paid out from capital). Note It helps investors to capture potential source of income.
- Since the inception (10 December 2015) to the end of August 2025, the Fund's AM (USD) Distribution share class has monthly dividend payout and has achieved average historical annualised dividend yield of over 4.6%.

i: The average historical annualized dividend yield means the average of the annualized dividend yield of each month from January 2016 to August 2025. Annualized Dividend Yield = [(1+Dividend Per Share/Ex-Dividend Date NAV)¹²-1] x 100. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Historical dividend yield is not indicative of future dividend payouts.

Distribution history of Allianz US Short Duration High Income Bond – Class AM (USD) Distribution^{Note}

Ex-Dividend Date	Dividend Per Share (USD)	Annualized Dividend Yield ⁱ
18/08/2025	0.05211	7.19%
15/07/2025	0.05211	7.14%
16/06/2025	0.05211	7.17%
15/05/2025	0.05211	7.02%
15/04/2025	0.05211	7.10%
17/03/2025	0.04700	6.15%

2. Mitigating credit risk with an emphasis on higher quality

 Among high yield bonds universe, the Fund exhibits relatively low volatility due to its short duration and a portfolio comprising higher credit quality high yield (HY) bonds. Generally, higher credit quality HY bonds have lower default rates than lower credit quality HY bonds.

3. Better risk-adjusted return

- Short-duration high yield bonds deliver comparable returns to their long-dated counterparts but with reduced volatility.
- Higher-quality high yield bonds may tend to enjoy higher risk adjusted returns and exhibit lower volatility levels.
- The Fund's short-duration, higher-quality bias may therefore deliver better risk-adjusted returns and potential downside mitigation.
