

- The Fund aims at long-term income and lower volatility by investing in short duration high yield rated corporate bonds of the United States of America ("US") bond markets in accordance with environmental and social characteristics. The Fund aims to achieve the Sustainability KPI with the adoption of the Sustainability Key Performance Indicator Strategy (Absolute) ("KPI Strategy (Absolute)"). The Fund does not constitute as an ESG fund pursuant to the SFC's circular issued on 29 June 2021.
 - The Fund is exposed to significant risks of investment/general market, creditworthiness/credit rating/downgrading, default, interest rate, valuation, sovereign debt, country and region, and the adverse impact on RMB share classes due to currency depreciation.
 - The Fund is exposed to sustainable investment risks relating to KPI Strategy (Absolute) (such as foregoing opportunities to buy certain securities when it might otherwise be advantageous to do so, selling securities when it might be disadvantageous to do so, and/or reducing risk diversifications compared to broadly based funds) which may result in the Fund being more volatile and have adverse impact on the performance of the Fund and consequently adversely affect an investor's investment in the Fund.
 - The Fund may invest in high-yield (non-investment grade and unrated) investments and convertible bonds which may subject to higher risks, such as volatility, loss of principal and interest, creditworthiness and downgrading, default, interest rate, general market and liquidity risks and therefore may adversely impact the net asset value of the Fund. Convertible may also expose to risks such as prepayment, equity movement and greater volatility than straight bond investments.
 - The Fund may invest in financial derivative instruments ("FDI") which may expose to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
 - This investment may involve risks that could result in loss of part or entire amount of investors' investment.
 - In making investment decisions, investors should not rely solely on this material.
- Note:** Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund's capital or effectively out of the Fund's capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced, in particular for hedged share classes for which the distribution amount and NAV of any hedged share classes (HSC) may be adversely affected by differences in the interests rates of the reference currency of the HSC and the base currency of the Fund.

[^] The currencies-hedged share classes are not recommended for investors whose base currency of investment is not in respective hedged currencies.

Market Insights

1. Yield Opportunity amid tighter monetary environment

- Bonds with longer durations tend to be more sensitive to rising interest rates than those with shorter durations. In a tighter monetary environment, US short duration high yield bonds offer a compelling yield opportunity with lower interest-rate sensitivity to enhance diversification and relative performance.
- With the market trading at a discount to face value, high yield bonds offer attractive total return potential and spreads that compensate for risks.

Chart 1 source from ICE Data Services, as at December 2024. High yield performance is measured using ICE BofA US High Yield Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Chart 1: Historical positive returns following a down year

2. Default Rates remain below historical peaks

- Credit fundamentals are healthy, near-term refinancing obligations remain low and management continues to prioritize debt reduction. Default rates are expected to remain well below the historical cycle peak.

Chart 2 source from BofA, JP Morgan, as at December 2024. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Chart 2: Historical defaults rates of high yield bonds

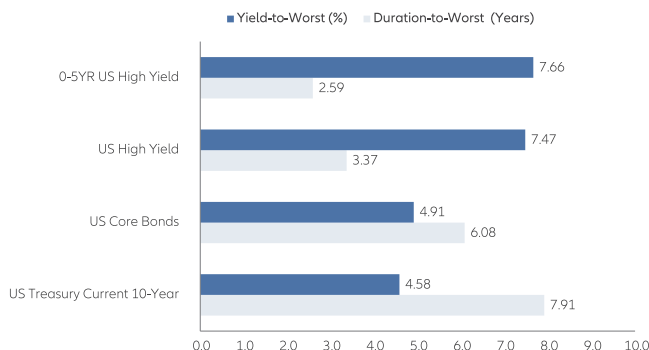

3. Shorter maturity, attractive yields

- Short duration high yield bonds provide a higher yield while offering shorter maturities than their longer-term counterparts.

Chart 3 source from Voya Investment Management, FactSet, ICE Data Services. Fund Features

1. Potential sustainable income opportunities available

- The Fund focuses on long-term income by investing in short duration high yield rated corporate bonds of the US bond markets.
- The Fund's AM share classes aim to pay monthly dividend (dividend yields are not guaranteed, dividend may be paid out from capital).^{Note} It helps investors to capture potential source of income.
- Since the inception (10 December 2015) to the end of February 2026, the Fund's AM (USD) Distribution share class has monthly dividend payout and has achieved average historical annualised dividend yieldⁱ of over 4.6%.

i: The average historical annualized dividend yield means the average of the annualized dividend yield of each month from January 2016 to February 2026. Annualized Dividend Yield = $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{12} - 1] \times 100$. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Historical dividend yield is not indicative of future dividend payouts.

Distribution history of Allianz US Short Duration High Income Bond – Class AM (USD) Distribution^{Note}

Ex-Dividend Date	Dividend Per Share (USD)	Annualized Dividend Yield ⁱ
17/02/2026	0.05211	7.26%
15/01/2026	0.05211	7.20%
15/12/2025	0.05211	7.23%
17/11/2025	0.05211	7.18%
15/10/2025	0.05211	7.14%
15/09/2025	0.05211	7.13%

2. Mitigating credit risk with an emphasis on higher quality

- Among high yield bonds universe, the Fund exhibits relatively low volatility due to its short duration and a portfolio comprising higher credit quality high yield (HY) bonds. Generally, higher credit quality HY bonds have lower default rates than lower credit quality HY bonds.

ii source from Allianz Global Investors, as at 28 February 2026.

Portfolio breakdown

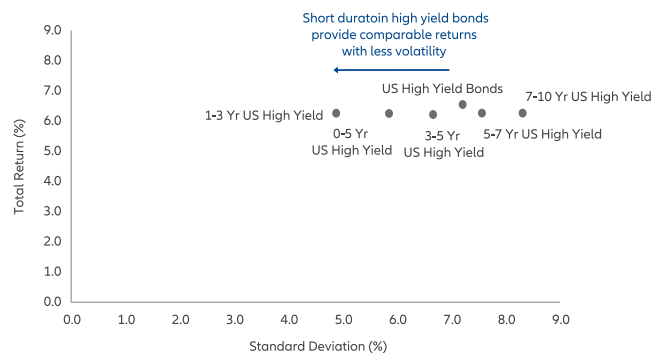

Portfolio Duration Breakdown ⁱⁱ		Portfolio Credit Quality Breakdown ⁱⁱ

Duration to Worst	1.89 years	Average	Ba3/BB-

3. Better risk-adjusted return

- Short-duration high yield bonds deliver comparable returns to their long-dated counterparts but with reduced volatility.
- Higher-quality high yield bonds may tend to enjoy higher risk adjusted returns and exhibit lower volatility levels.
- The Fund's short-duration, higher-quality bias may therefore deliver better risk-adjusted returns and potential downside mitigation.

Source: All fund data quoted are Allianz Global Investors/IDS GmbH/Morningstar, as at 28/02/2026, unless stated otherwise.

Allianz Global Investors and Voya Investment Management entered into a long-term strategic partnership on 25 July 2022, upon which the investment team transferred to Voya Investment Management. This did not materially change the composition of the team, the investment philosophy nor the investment process. Management Company: Allianz Global Investors GmbH. Delegated Manager: Voya Investment Management Co. LLC ("Voya IM").

Fund performance is calculated on NAV to NAV basis in denominated currency of the respective share class with gross dividends re-invested. Benchmark performance is calculated in denominated currency of the respective share class. HKD/USD based investors are exposed to foreign exchange fluctuations.

¹ The currency-hedged share classes are not recommended for investors whose base currency of investment is not in respective hedged currencies.

1) Source: Fund Selector Asia. The fund award winners were selected through both quantitative and qualitative methods. FE Fundinfo used its Crown Rating methodology to assess funds based on alpha, volatility and consistency of performance from 30 September 2021 to 30 September 2024 and create a shortlist for 14 asset classes. The shortlist was given to an independent panel of professionals from Asia's fund selector community in Hong Kong. Each judge selected the funds he or she thought would outperform in the next 12 months.

2) Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only. Yields are not guaranteed, dividend may be paid out from capital (Class AM). This may result in an immediate decrease in the NAV per share and may reduce the capital available for the Fund for future investment and capital growth. Positive distribution yield does not imply positive return.

3) Annualised Dividend Yield = [(1 + Dividend Per Share / Ex-Dividend Date NAV)¹² - 1] X 100. The annualised dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Historical dividend yield is not indicative of future dividend payouts.

4) Effective from 25 July 2022, this Fund Manager has transferred to Voya Investment Management Co. LLC ("Voya IM") as part of the strategic partnership agreement between Allianz Global Investors and Voya IM.

5) The Fund Size quoted includes all share classes of the Fund.

6) EU Sustainability-related Disclosure Regulation. Information is accurate at time of publishing.

7) The All-in-Fee includes the expenses previously called management and administration fees.

8) Total Expense Ratio (TER): Total cost (except transaction costs) charged to the Fund during the last financial year (as at 30/09/2025) expressed as a ratio of the Fund's average NAV. For share classes that have been incepted for less than one year, as at close of the last financial year (please refer to the Inception Date in the Fund Details table), the TER will be annualised. For share classes incepted after the close of the last financial year, the TER will be reflected as N/A.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice. Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance. Investors should read the offering documents for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited. The Fund is not domiciled in the Macao Special Administrative Region ("Macao SAR"), and its regulatory standards may differ from those applicable in the Macao SAR.
